

■ WIPER ARM AND BLADE

A unified construction is used for the wiper blade and arm. A fin-shaped resin cover is adopted for the entire wiper blade. This ensures the effectiveness of the wipers even when traveling at high speeds.

Service Tip

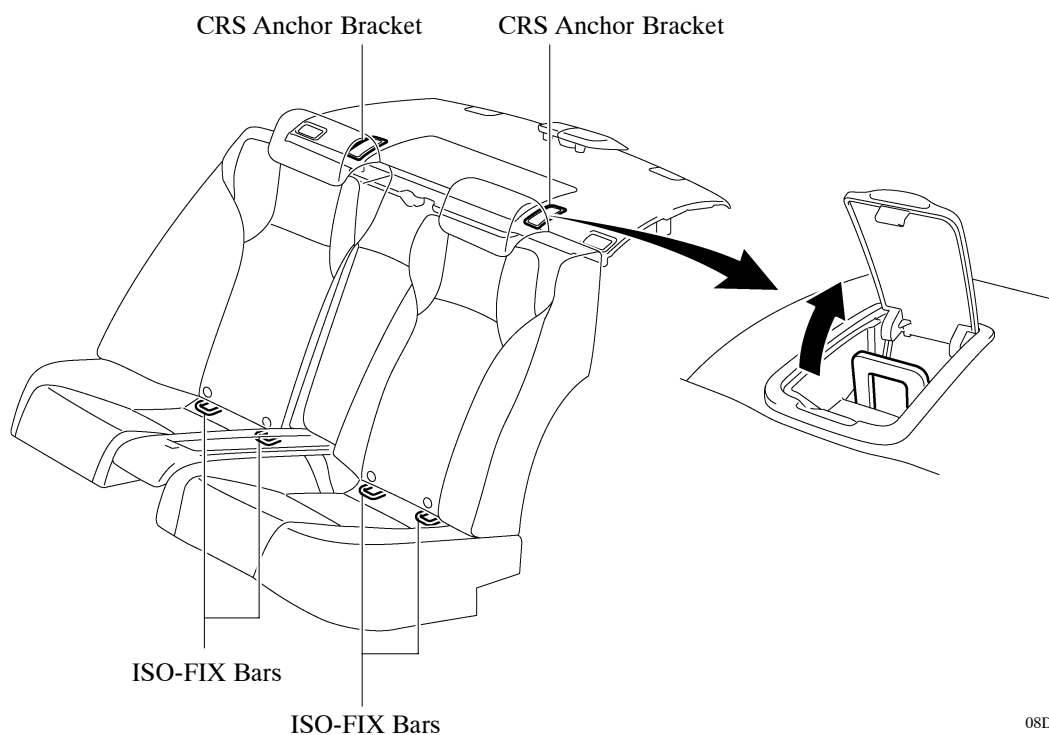

When lifting the wiper arms away from the windshield pull the driver side wiper arm upward first, and repeat for the passenger side. When returning the wipers to their original position, do so from the passenger side first.

BO

■ CHILD RESTRAINT SYSTEM

ISO-FIX Bars for securing child seats are provided behind the seat cushion of the rear seat.

- Two CRS (Child Restraint System) anchor brackets for securing a child seat are provided above the package tray trim.
